README

Lab Billing Research

Billing event reconstruction and payment-delay early-warning methods for clinical laboratory settings. This repository contains the research tooling, synthetic demonstration data, evaluation suites, and reports.

Quick start

```
uv venv --python 3.12 .venv
uv pip install --python .venv/bin/python -r requirements.lock.txt
python scripts/run_demo.py --config configs/demo.json
python -m pytest -q --junitxml outputs/qa/junit.xml
streamlit run app/main.py --server.address 127.0.0.1
```

Data status

- DEMO mode: synthetic data generated in-repo (seed 42). No real patient or billing data is contained in this repository.
- REAL-LOCAL mode: disabled by default; requires documented authorization. See governance/data_permissions.json.

Layout

See CHANGELOG.md for version history and migration notes.
